

FORMULA PLASTICS LTD

Environmental Policy

Formula Plastics Ltd specialise in the injection moulding and assembly of high tolerance precision components into leading industries such as automotive, lighting and electronics. Formula Plastics have the capabilities of managing the process from tooling design through moulding, assembly and supply chain ensuring on time in full delivery to the UK, Europe & Worldwide.

Our aim is to provide our customers with an excellent service whilst looking to reduce our impact on the environment.

We will look to continually improve the way we operate to improve our environmental performance and seek to prevent pollution through the use of modern technology and best working practice. In doing so we are committed to ensuring that we comply fully with the relevant environmental legislation and other requirements that are applicable to the organisation

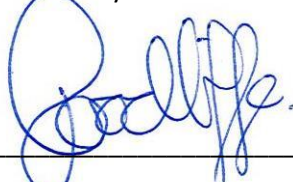

We recognise that we have a number of significant impacts on the environment so we will aim to:

- reduce our consumption of resources used in our operations
- manage our waste streams and seek to eliminate, reduce, reuse or recycle where practical.
- reducing energy consumption.
- maintain our equipment to ensure that they are operating effectively and efficiently
- employ good housekeeping practices at all times and ensure efficient use of resources.

These aims will be accomplished through the implementation of an effective environment management system including the setting of appropriate objectives and targets which will be regularly audited and reviewed to monitor that it is achieving the aims of the policy.

We also recognise the important role staff and others working on our behalf in achieving this policy. They will be made aware of their responsibilities and appropriate support including training will be provided where necessary.
